TECHNOLOGY ORAL PRESENTATION RUBRIC

NAME: _____DATE: _____TOTAL:_____

INDICATOR	EXCEEDS (100-90)	MEETS (89-70)	DEVELOPING (69-60)	NOT DONE (0)
Accuracy, depth and suitability of content	Content is almost flawless and fully suitable for intended audience. Information is completely unique and unusual and demonstrates diligence of presenter in researching topic.	Content has several errors and is fully suitable. Information is somewhat unique and unusual and demonstrates a good effort of presenter in researching topic.	Content has many errors and is unsuitable. Information is average and ordinary, demonstrating little effort in researching topic.	Not done.
Completion of content	Content contains all required components of project.	Content contains most of the required components of project.	Content is missing many required components of project.	Not done.
Clarity of expression (verbal and non-verbal)	Speaker enhances the project by using clear speech, excellent eye contact, and appropriate tone, volume, pace, transitions and vocabulary throughout presentation. Good posture, natural hand gestures and appropriate dress enhance presentation.	Speaker uses clear speech, maintains good eye contact, and proper spacing, tone, volume, pace, transitions and vocabulary during the presentation. Good posture, hand motions and dress are appropriate for the presentation.	Speaker uses unclear speech, little eye contact, inappropriate volume or language, and/or choppy spacing and monotone in more than half of the presentation. Posture, gestures or dress distract the audience.	Not done.
Familiarity with information	Speaker is very confident with the material, maintains excellent focus throughout the presentation, and uses very few prompts to present information.	Speaker is confident with the material, maintains good focus during the presentation, and uses note cards or relies on text as prompts to present information, often reading directly from them.	Speaker is somewhat confident with the material, loses focus, and reads directly from note cards or from the power point or Prezi notes throughout presentation.	Not done.
Design of slides	Slides are extremely colorful or contrasted, creative, and uniquely sized, framed, and/or spaced with appropriate size and amount of text. Graphics show excellent depth and detail. Presentation piques interest of the viewer. Animations of text and graphics enhance every slide. Transitions are used between slides.	Slides are somewhat colorful, creative, and uniquely sized, framed, and/or spaced. Some text is crowded and/or too small. Some graphics show little depth and detail. Presentation is interesting to the viewer. Some animations and transitions are included.	Slides are somewhat dull, uninteresting and not unique. Text is too crowded and/or illegible. Presentation is somewhat monotonous and repetitive to the viewer. Few animations and/or transitions are included.	Not done.
Inclusion of introduction, conclusion, and work citations	Introduction creatively establishes importance of topic and the name of the presenter, and contains pictures to reveal content of presentation. Conclusion briefly summarizes the importance of the presentation and has a related graphic. Work citations for text and graphics are properly formatted and represented.	Introduction establishes topic and presenter. Conclusion summarizes the presentation and contains a graphic. Work citations for text and graphics are included, but may not be complete.	Introduction briefly establishes topic and presenter. Conclusion weakly sums up the topic. Work citations are minimal.	Not done.
